CompareView Software

CompareView is an easy to use but powerful software program for multiple on-screen image comparison, client/project management and basic image editing. CompareView works with just about any video camera or video camera microscope for displaying live video & capturing digital still images.

Applications: Skin Care, Hair Care, Quality Control for almost any manufactured item, Education, Mineralogy, Gemology and Jewelry, Textiles, Coin and Stamp Collecting, Forensics

Simple...Powerful...Reliable...Cost Effective

Features

- Live image display and image capture from most video cameras and video camera microscopes
- Compare up to 16 images on the screen with custom positioning
- Keep images and data organized with a simple Client/Project Folder feature
- Reports feature tracks images, analysis data, and notes as you work; displays then saves reports for future reference. Report comparison shows two reports side by side.
- Easily print and export single images or image groups to other programs
- Basic image editing including calibrated measuring (linear and area), text annotation, drawing tools
- Image Enhancement tools for color, sharpness, exposure, image rotation, etc
- Network capability allows multiple users to access shared data
- Optional hair analysis upgrade helps determine Alopecia hair loss level, assists in measuring hair density and width averages

System Requirements

Windows XP (Service Pack 3), Vista, 7, or newer
Requires Microsoft .NET Framework 4.0 (free download from Microsoft)

Pentium 1 GHz or higher
512 MB available RAM
850 MB available disk space
