## CompareView Hair

CompareView Hair is an easy to use but powerful software program. CompareView Hair assists users with multiple on-screen image comparison, client management, basic image editing, and image analysis for Alopecia, Hair Density, and Hair Width.

**Applications:** Hair Care Product Sales, Scalp Care Product Sales, Hair Restoration, Hair Replacement

*Simple...Powerful...Reliable...Cost Effective*

### Features

- Increases hair & scalp care product sales with dramatic magnified images
- Tracks hair restoration/replacement progress with image archiving and report archiving
- Live image display and image capture from most video cameras and video camera microscopes
- Compare up to 16 images on the screen with custom positioning
- Keep images and data organized with a simple Client Folder feature
- Reports feature tracks images, analysis data, and notes as you work; displays then saves reports for future reference. Report comparison shows two reports side by side.
- Hair analysis feature helps determine Alopecia hair loss level, assists in measuring hair density and width averages
- Easily print and export single images or image groups to other programs
- Basic image editing including calibrated measuring (linear and area), text annotation, drawing tools
- Image Enhancement tools for color, sharpness, exposure, rotation, etc
- Network capability allows multiple users to access shared data

### System Requirements

Windows XP (Service Pack 3), Vista, 7, or newer  
Requires Microsoft .NET Framework 4.0 (free download from Microsoft)

Pentium 1 GHz or higher  
512 MB available RAM  
850 MB available disk space
